

Apprentices and Technical Training

The National Fluid Power Centre has some of the BEST practical training facilities in Europe and highly experienced Training Engineers able to provide outstanding tuition and training to YOUR Apprentices. By investing in your Apprentices, you are investing for your future and that of your company. **This is their FIRST STEP TO SYSTEMS ENGINEERING**

In conjunction with their local college academic studies and their work based experience, why not consider sending your Level 2/3 Apprentices to the National Centre for training in **HYDRAULICS and BASIC ELECTRICAL/ELECTRONICS** plus the provision of a **BFPA/CETOP** Competence Based Qualification at Level 1. **WHY NOT MAKE THIS YOUR COMPANY STANDARD FOR ALL APPRENTICES.?**

Consider the following training package for your 2nd and 3rd year APPRENTICES
