

Message from John R Savage -Director

We may be in “Lockdown” but we have found the VITAL KEY-
Realising the restrictions on travel and face-to-face Practical Skills Training, here at the UKs National Fluid Power Centre, we will continue to support the development of your staff involving **HYDRAULICS, PNEUMATICS and APPLIED ELECTRONICS**, through our **outstanding TECHNICAL WEBINARS**.

From Advanced Apprentices to that of experienced Engineers- these are members of your workforce and the continued success of your Company, (in better times) greatly depends upon these “Key Staff”.
Now could be a good opportunity to further educate them at the affordable prices offered by the NFPC.

Step 1
Visit the NFPC Website www.nfpc.co.uk
Use the FOC online self-assessment and check your current knowledge level.
Now select the Webinars that meet your needs

Step 2
Having decided which Webinar meets your needs, then contact the NFPC Business Team, check availability and reserve your place.
The Business Team will guide you through the rest

Step 3 (After Lockdown)
Follow-on Practical Skills
Our Business Team will ask if they can contact you at a later date and offer you the option to attend the NFPC

OUR PLAN TO OFFER YOU-

All NFPC Stage 1 Courses meet BFPA MERs

ZOOM Webinars	Duration	Frequency	Cost
Stage 1 Hydraulics	2 Days	Twice Every Week (Mon-Tues) or (Wed-Thurs)	£600.00 Exc VAT
